To: ham-space@ucsd.edu

I need information for a homebrew GPS (Global Positioning
System). Books, magazines, references, and internet resources
would be extremely helpful. I need information on theory,
frequencies and modulation, and circuit schematics. Although I
would prefer to build my own, any information about commercially
available units would be helpful (specifications, sources, and
prices), however I will need to hook the output of the device
into other equipment. I am also seeking good information on how
to set up an experiential differential GPS system.

Good question Keith.... does anyone know if they can be found at an
ftp'able site? If not... I'll check with Dan to see if he has any problem
with me sending the file to someone with ftp capabilities!

73 for now.... c u on the shortwaves
